

The results of the Colorado Scorecard on Commercial Payment Reform are in, and 57% of all commercial payments are value-oriented—either tied to performance or designed to cut waste. Status-quo payments make up the remaining 43%. These data are from calendar year 2016 or the most recent 12 months available.

Fee-for-Service (FFS) remains the dominant base method of payments to providers, even when the payment is value-oriented. Of all the value-oriented commercial payments health plans made in Colorado in 2016, 86% are still based on FFS and 14% are based on a non-FFS payment method. Value-oriented payment methods categorized as non-FFS include: bundled payment, full capitation, partial or condition-specific capitation, and payment for non-visit functions, while pay-for-performance, shared savings, and shared risk rely on FFS.

Less than a quarter of value-oriented payments put providers at risk. About 78% of value-oriented payments offer providers a financial upside only, with no downside financial risk.

#### ACKNOWLEDGMENTS

The Colorado Scorecard on Commercial Payment Reform 2.0 was made possible by the Laura and John Arnold Foundation and the Robert Wood Johnson Foundation, as well as the leadership of the Center for Improving Value in Health Care (CIVHC). CPR thanks CIVHC staff Cari Frank, VP of Communication and Marketing, Jonathan Mathieu, VP of Data and Delivery, and Maria de Jesus Diaz-Perez, Director of Public Reporting; CPR project leads Andréa Caballero and Alejandra Vargas-Johnson; CPR staff Lea Tessitore and Roslyn Murray; as well as the health plans that provided data for the Scorecard, for their significant contributions to this project.
