

Using health plan data from calendar year 2017, the National Scorecard on Commercial Payment Reform found that 53% of all commercial payments were value-oriented—either tied to performance or designed to cut waste. Status-quo payments made up the remaining 47%.

In 2017, most value-oriented payments to providers maintained a fee for service (FFS) foundation (47% of total dollars flowed through fee-for-service based value-oriented methods), while only 5.3% of payments flowed through value-oriented methods that did not involve any FFS payment. Value-oriented payment methods categorized as non-FFS include bundled payment, full capitation, partial or condition-specific capitation, and payment for non-visit functions, while pay-for-performance, shared savings, and shared risk are FFS-based.

About 89% of value-oriented payments in 2017 offered providers a financial upside only, with no downside financial risk. The remaining value-oriented payments (11%) put providers at financial risk for their performance and spending.

#### ACKNOWLEDGMENTS

The 2018 National Scorecard on Commercial Payment Reform 2.0 was funded by a grant from the Robert Wood Johnson Foundation. The Scorecard uses data from the National Alliance of Healthcare Purchaser Coalitions' eValue8 health plan survey. CPR thanks Foong-Khwan Siew, Director of eValue8; CPR project leads Andréa Caballero and Alejandra Vargas-Johnson; CPR staff Lea Tessitore and Emma Wager, the various business coalition members whose partnership made eValue8 possible (the Colorado Business Group on Health, HealthCare 21, the Houston Business Coalition on Health, the Lehigh Valley Business Coalition on Healthcare, the Memphis Business Group on Health, the Mid-Atlantic Business Group on Health, the Northeast Business Group on Health, the Pacific Business Group on Health, and the Washington Health Alliance), as well as the health plans that provided data for the Scorecard, for their significant contributions to this project.
